EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

1. This Office Action is in response to the AMENDMENT filed on December 15, 2005 for the application number 09/906,997.
2. The pending claims 134-234 are allowed.
3. The following is an examiner's statement of reasons for allowance: Burkey et al (US Pat No 6,446,076) discloses a computer-implemented method for defining a persona (theme) (Fig. 12) for use by a computing device in presenting information that is appropriate to a contextual situation represented by the theme (column 30, lines 52-67).

Burkey, however, neither renders obvious nor anticipates the combination of claimed elements because Burkey fails to teach all the elements recited in applicant's claims. Applicant's claims recites "a method for assisting a user of a wearable computing device in creating a theme for user in presenting information to the user, The preamble further includes elements which breaths life into the claims. The method recites, a plurality of steps including among other steps "determining that one of the multiple previously created themes models the current contextual situation such that each of the context attributes specified for that one theme has a current value indicated in the received current context information that matches one of the specified possible values associated with that context attribute." as recited in independent claim 134. Burkey further fails to teach "defining a theme based on the received indications that cane be user by the computing device to

present the appropriate information when context information for a contextual situation includes values for the indicated context attributes that are automatically determined by the indicated criteria to match the represented contextual situation” as claimed in independent claim 152. The remaining independent claims, a computer readable medium claim 192, a computing device claim 195, a computer system claim 198 and a method claim 199, while not necessary identical in scope, contain limitations substantially similar to independent claim 152 and therefore are allowed under the same rationale.

Thus, prior art of record neither renders obvious nor anticipates the combination of claimed elements as specified in claims 134-234.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
